Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

This book is essential for students and practitioners in accounting, international business, finance, and economics. In a straightforward and readable style, it focuses on the changing accounting and auditing standards in national and global economies in the post-Enron/Arthur Andersen era. The authors clarify the reasons behind and consequences of the accounting profession's failure in auditing and self-regulation, as most firms placed consulting profits ahead of public audit duties. They show how Sarbanes-Oxley solutions, while not perfect, are major contributors to the profession's redemption, and have enabled it to rise to new heights of service and revenue. The book offers a detailed examination of accounting practitioners' past challenges and future prospects. It provides a realistic analysis of specific issues facing accounting and auditing firms today, including the growing problem of independence; the need for one set of international accounting standards and one set of auditing standards; adjustments facing the global financial system; and the impact of the Internet and communication systems on accounting firms.
