In a global economy full of multinational firms, international human resource

management (including expatriation, career management, and talent management) is a growing topic in the business and management literature and in universities. A thorough understanding of the adjustment of expatriates to their new environment is critical not only for selection and preparation of potential expatriates, but also for the management of expatriate performance. Managed well, expatriates can be key contributors to organizational success while abroad and even after repatriation. Poor understanding and management of expatriate issues, on the other hand, may lead to underperformance and increased turnover of expatriates and repatriates. *Managing Performance Abroad* summarizes and extends what is known about the topic of expatriate management and adjustment, covering all the major authors and presenting a new approach to the adjustment process. At present, expatriate adjustment is only covered as a chapter in books on international HRM and HRD. Much of this literature relies on outdated concepts and evidence. Furthermore, most business research and management publications use an expatriate adjustment model that was originally published about two decades ago. This book is the first dedicated solely to the subject of expatriate adjustment, enabling readers to formulate research questions and hypotheses and to develop expatriation policies and support systems that optimize the performance of expatriates. It presents a re-formulation of the model underlying management research about expatriate adjustment, providing guidance for researchers and practitioners alike.

Challenging misconceptions about life in the inner-city, *Managing to Make It* shows that poor parenting is not necessarily more common in disadvantaged neighborhoods and explains why neighborhood advantaged is not invariably linked to success. At the same time the study offers a wealth of information about programs, services, and policy decisions that will be indispensable to policy makers, sociologists, educators, and anyone concerned with the fate of the urban poor.

Since the mid 1990s political and public debates about the social responsibilities of firms have gained renewed force. Although CSR seems to be a well defined concept in management literature, in its diverse applications the CSR concept loses much of its pertinence. In *Managing Corporate Social Responsibility in Action*, the authors focus on different aspects of managing CSR in action to capture differences between discourse and practice. By examining the question from three angles - talking about CSR, doing CSR and measuring CSR - they attempt to make sense of the difference between practice and reality. This volume considers ways to overcome the difficulties that arise around CSR in action.

This book is for any woman considering a vaginal birth after one or more previous caesareans. What are the risks? What are the advantages? What is the best choice in your particular case? The author, H el ene Vadeboncoeur, takes you through the research and also gives you a glimpse into other women's experiences through the use of first-hand accounts. It was, in fact, the author's experience of two very different births (one a caesarean, the next a VBAC) that inspired her to get a PhD. In her thesis she explored how women experience giving birth in hospital. H el ene wanted to consider questions about birth because this is such an important event in women's lives. For over 10 years since then, she has divided her time between teaching and participating in research projects. (She is currently on the Board of the International MotherBaby Childbirth Organization.) She also regularly gives talks at conferences around the world. This means that you not only get the benefit of advice from a woman who's been through both a caesarean and a VBAC, you also get taken through the most up-to-date research (now updated for the 2nd edition). Serious information is presented in an upbeat, readable style. Comment from a consultant: "As a professional who is concerned about the risk in the caesarean rate I would like to suggest that all women who have anything to do with caesareans read this book. The author has collected research data and precious accounts, which will help women make an informed choice as to how to give birth to their babies." Feedback from a midwife: "H el ene Vadeboncoeur offers women an important tool to support them if they choose to give birth vaginally after a previous caesarean." Comment from a reader of the original, French edition: "This book is a response to questions. It will serve to demystify fears and inspire confidence."

A small dolphin on the ankle, a black line on the lower back, a flower on the hip, or a child's name on the shoulder blade—among the women who make up the twenty percent of all adults in the USA who have tattoos, these are by far the most popular choices. Tattoos like these are cute, small, and can be easily hidden, and they fit right in with society's preconceived notions about what is 'gender appropriate' for women. But what about women who are heavily tattooed? Or women who visibly wear imagery, like skulls, that can be perceived as masculine or ugly when inked on their skin? Drawing on autoethnography, and extensive interviews with heavily tattooed women, *Covered in Ink* provides insight into the increasingly visible subculture of women with tattoos. Author Beverly Thompson visits tattoos parlors, talking to female tattoo artists and the women they ink, and she attends tattoo conventions and Miss Tattoo pageants where heavily tattooed women congregate to share their mutual love for the art form. Along the way, she brings to life women's love of ink, their very personal choices of tattoo art, and the meaning tattooing has come to carry in their lives, as well as their struggles with gender norms, employment discrimination, and family rejection. Thompson finds that, despite the stigma and social opposition heavily tattooed women face, many feel empowered by their tattoos and strongly believe they are creating a space for self-expression that also presents a positive body image. A riveting and unique study, *Covered in Ink* provides important insight into the often unseen world of women and tattooing. Instructor's Guide

Andrew Lloyd Webber is the most famous—and most controversial—composer of musical theater alive today. Hundreds of millions of people have seen his musicals, which include *Cats*, *The Phantom of the Opera*, *Starlight Express*, *Joseph and the Amazing Technicolor Dreamcoat*, *Jesus Christ Superstar*, *Evita*, and *Sunset Boulevard*. Even more know his songs. Lloyd Webber's many awards include seven Tonys and three Grammys—but he has nonetheless been the subject of greater critical vitriol than any of his artistic peers. Why have both the man and his work provoked such extreme responses? Does he challenge his audiences, or merely recycle the comfortable and familiar? Over three decades, how has Lloyd Webber changed fundamentally what a musical can be? In this sustained examination of Lloyd Webber's creative career, the music scholar John Snelson explores the vast range of influences that have informed

Lloyd Webber's work, from film, rock, and pop music to Lloyd Webber's own life story. This rigorous and sympathetic survey will be essential reading for anyone interested in Lloyd Webber's musicals and the world of modern musical theater that he has been so instrumental in shaping.
