With more than one million people behind bars, the United States imprisons a larger share of its population than any other industrialized nation. This has precipitated a serious overcrowding problem with federal and state prisons currently operating well beyond capacity. Conventional efforts appear unable to cope with the increasing shortage of beds or with inadequate rehabilitation services. A bold solution is required; increasingly it is being seen to reside in the private sector. This timely volume explores the issues of private versus public financing, construction, and management of medium-and high-security prisons. Private prisons are not a new concept in the United States. They have existed in several forms since the eighteenth century. The opening chapters evaluate historical cases of prisons for profit, examining the concerns of labor, abuses of inmates, and the source and resolution of disputes between private and public sectors. These chapters argue that the experience gained through privatization does not justify current opposition from civil libertarians or labor unions. Chapters dealing with the modern contracting out of complete management and limited services document the growing trend toward privatization and instances of public/private partnership in

prison industries. The assembled evidence indicates clearly that privately run prisons have shown significant cost savings and good quality of provision for prisoners while still being profitable. However, the authors caution that these promising results must be reinforced by public safeguards in the contracting stage and monitoring to assure good service and security. With the American prison system in disarray, the public interest demands that government look beyond the public or private identity of those who wish to provide correctional services and focus instead on who can provide the best services at a given cost. It is essential to state that correctional services should attain several objectives and not merely cost minimization. The analysis and recommendations presented here will aid in the task. "Privatizing Correctional Institutions" will be of interest to law-enforcement officials, public policy analysts, penologists, and criminologists.

This is an introductory text on the changing nature of correctional officer careers, focusing on personnel, management, and organizational issues.

A little girl comes to live in his uncle's lonely house and discovers a boy, her handicapped cousin and a mystery of a locked garden.

In response to recognition in the late 1960s and early 1970s that traditional incarceration was not working, alternatives to standard prison settings were sought and developed. One of those alternatives—community-based corrections—had been conceived in the 1950s as a system that might prove more progressive, humane, and effective, particularly with people who had committed less serious criminal offenses and for whom incarceration, with constant exposure to serious offenders and career criminals, might prove more damaging than rehabilitative. The alternative of community corrections has evolved to become a substantial part of the criminal

Voices From American Prisons: Faith, Education and Healing is a comprehensive and

unique contribution to understanding the dynamics and nature of penal confinement. In this book, author Kaia Stern describes the history of punishment and prison education in the United States and proposes that specific religious and racial ideologies - notions of sin, evil and otherness - continue to shape our relationship to crime and punishment through contemporary penal policy. Inspired by people who have lived, worked, and studied in U.S. prisons, Stern invites us to rethink the current 'punishment crisis' in the United States. Based on in-depth interviews with people who were incarcerated, as well as extensive conversations with students, teachers, corrections staff, and prison administrators, the book introduces the voices of those who have participated in the few remaining post-secondary education programs that exist behind bars. Drawing on individual narrative and various modern day case examples, Stern focuses on dehumanization, resistance, and community transformation. She demonstrates how prison education is essential, can provide healing, and yet is still not enough to interrupt mass incarceration. In short, this book explores the possibility of transformation from a retributive punishment system to a system of justice. The book's engaging, human accounts and multidisciplinary perspective will appeal to criminologists, sociologists, historians, theologians and scholars of education alike. Voices from American Prisons will also capture general readers who are interested in learning about a timely and often silenced reality of contemporary modern society.

This two-volume set aims to provide a critical overview of penal institutions within a
