

International Management Deresky

Winner of the Management and Leadership Textbook category at the CMI Management Book of the Year Awards 2013/14, International Management explores management opportunities in encounters across the world between national, organizational, political, professional and social cultures. It is soundly based theoretically and supported with real-life international examples from contemporary events and situations, exploring contemporary and historical material to provide insights for today's managers who find themselves dealing with diversity and difference. From a historical perspective and a uniquely cross-disciplinary approach, Elizabeth Christopher identifies the major leadership styles that continue to characterise people across regions, nations, communities and organisations, within groups and as individuals. International Management is a practical and comprehensive textbook for successful negotiation in a world rich not only in cultural diversity but also in convergence. It also covers the ethical, moral and environmental ramifications of business today and the corporate leaders who are learning to manage their businesses across nations and continents, not only profitably but in ways that contribute to societies overall through economic, environmental and social action. International Management is an indispensable guide for students and practitioners to key issues of cross-cultural management, suitable to accompany online or private studies, or a teaching unit within professional and university graduate studies of international management.

Diversity managers who want to integrate cost-effective, battle-tested initiatives don't have enough tools and resources to identify and apply best practices to actual work situations. These programs demand time, energy, and money-and the empirical evidence about outcomes is limited. The few studies out there contradict each other, which can make it nearly impossible to determine what practices to implement. Dr. Shelton J. Goode, who has spent more than twenty years as a diversity and human resource management professional, cuts through the clutter to help you locate strengths and weaknesses in your diversity strategy. You can learn how to -benchmark organizational efforts against the actions other companies have taken to manage diversity; -identify outdated paradigms and misguided diversity management initiatives that have prevented others from capitalizing on talent embedded within the ranks; and -judge where past efforts have yielded success and which initiatives require a new approach. Despite the importance of linking diversity to the organization's bottom line, there has been no single, comprehensive resource that employees could turn to for guidance-until now! Business leaders at every level can find best practices to achieve organizational goals in Diversity Managers: Angels of Mercy or Barbarians at the Gate.

This is a good time to reflect on opportunities and challenges for Australia in Latin America. Impressive economic growth and opportunities for trade and investment have made Latin America a dynamic area for Australia and the Asia Pacific region. A growing Latin American population, Australia's attractiveness to Latin American students, a fascination with the cultural vibrancy of the Americas and an awareness of Latin America's increasingly independent stance in politics and economic diplomacy, have all contributed to raising the region's profile. This collection of essays provides the first substantial introduction to Australia's evolving engagement with Latin America, identifying current trends and opportunities, and making suggestions about how relationships in trade, investment, foreign aid, education, culture and the media could be strengthened.

This Companion provides an authoritative overview of how cultural diversity is managed in Asia. Although the Asian context appears at first sight to be irreconcilably divergent in terms of diversity management approaches, the contributing authors seek to explore thematic and geographical demarcations of the notions of cultural diversity and equality at work.

Managing Cultural Diversity in Asia not only examines cultural diversity management in a particular geography but also makes a distinct contribution to the wider theory of managing diversity and equality by revealing the significance of context, time and place in framing policies and practices of management. With empirical and conceptual contributions from eminent scholars from across the Asian continent as well as the Asian diaspora, this volume highlights practices of equality and diversity management in settings across Asia and reveals the key drivers and implications of such practices. This important and path-breaking Companion will be an invaluable resource for both undergraduate and research-based postgraduate students on international and comparative human resource management, employment relations and industrial relations courses.

This edited collection is an extraordinarily welcome text for those of us teaching international management in the US while observing with dismay the lack of critical awareness about the rest of the world in extant disciplinary scholarship. Rather than giving us the view from the rest, the collection advances a temporal and spatial relational approach to understanding globalization and compels its audience to bridge the gap between the west and the rest by bringing to visibility the cultural and material encounters co-constructing them. In this context, the various contributions deconstruct international management as market-based activity, exposing its mode of existence within complex power relations networks extending over time and space. Marta B. Calás, University of Massachusetts, US Organizations, Markets and Imperial Formations offers a set of innovative critiques of contemporary economic globalization. A major theme of the book is that our imperialist histories have resulted in a globalization process that replicates exploitative colonialist patterns. Chapter authors provide insights on a variety of subjects, including a critique of mainstream international management textbooks and the simplistic toolkits they offer to managers; an analysis of how a universalistic view of capitalism and economic organization results in exploitative patterns of resource appropriation; and documentation of the negative consequences of globalization, specifically, patterns of inequality and class segregation. Alison M. Konrad, University of Western Ontario, Canada This authoritative book explores the nexus between organization theory, globalization and imperialism and examines the effects of a global order organized around development and markets. The authors explore how interconnections between organization theory and the global political economy have led to the perpetuation of inequality and active reconfigurations of life, labour and the economy. They contend that cultural ethnocentrism and Western ideologies of development continue to inform the field of organizational studies and offer an alternate mode of theorizing. Through theoretical and empirical reflections, the authors produce a patchwork quilt of innovatively critical approaches to globalization. Graduate students, academics and scholars in the fields of management and organizational sciences, as well as postcolonial, development and globalization studies will find this book of particular interest. It is also an invaluable read for international management and strategy scholars, including those focused on multinational operations in the Third World.

Management practices and processes frequently differ across national and regional boundaries. What may be acceptable managerial behaviour in one culture may be counterproductive or even unacceptable in another. As managers increasingly find themselves working across cultures, the need to understand these differences has become increasingly important. This book examines why these differences exist and how global managers can develop strategies and tactics to deal with them. The text draws on recent research in anthropology, psychology, and management, to explain the cultural and psychological underpinnings that shape managerial attitudes and behaviours, whilst introducing a learning model to guide in the intellectual and practical development of managers seeking enhanced global expertise. It offers user-friendly conceptual models to guide understanding and exploration of topics and summarizes and integrates the lessons learned in each chapter in applications-oriented 'Manager's Notebooks'. A companion website featuring comprehensive chapter-by-chapter PPT slides is available at www.cambridge.org/management_across_cultures.

Using examples from the UK, Europe, America, Australia and Asia, this book provides an analysis of the latest thinking and practice in dealing with extreme and sudden reductions in demand for specific tourist destinations or products.
