What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

To the casual observer, the great enlightened city of Edinburgh, home of no-nonsense philosophers and cream teas, might appear immune to the rollercoaster of strong emotions. But at 44 Scotland Street, as Matthew and Elspeth embark on the risky enterprise of married love, the raffish portrait painter Angus Lordie has a premonition of disaster. And soon enough Irene Pollock is shocked to learn that her small son Bertie harbours a highly unsuitable ambition; the gloriously vain Bruce discovers a wrinkle and confronts rejection; and Angus finds himself facing the grave consequences of unbridled bliss, not to mention a large Glaswegian gangster bearing gifts . . .

Despite the all-pervading influence of television ninety per cent of people in Britain still listen to the radio, clocking up over a billion hours of listening between us every week. It's a background to all our lives: we wake up to our clock radios, we have the radio on in the kitchen as we make the tea, it's on at our workplaces and in our cars. From Listen With Mother to the illicit thrill of tuning into pirate stations like Radio Caroline; from receiving a musical education from John Peel or having our imagination unlocked by Douglas Adams' The Hitchhiker's Guide to the Galaxy; from school-free summers played out against a soundtrack of Radio One and Test Match Special to more grown-up soundtracks of the Today programme on Radio 4 and the solemn, rhythmic intonation of the shipping forecast – in many ways, our lives can be measured in kilohertz. Yet radio is changing because the way we listen to the radio is changing. Last year the number of digital listeners at home exceeded the number of analogue listeners for the first time, meaning the pop and crackle and the age of stumbling upon something by chance is coming to an end. There will soon be no dial to turn, no in-between spaces on the waveband for washes of static, mysterious beeps and faint, distant voices. The mystery will be gone: we'll always know exactly what it is we're listening to, whether it's via scrolling LCD on our digital radios, the box at the bottom of our TV screen or because we've gone in search of a particular streaming station. And so, as the world of analogue listening fades, Charlie Connelly takes stock of the history of radio and its place in our lives as one of the very few genuinely shared national experiences. He explores its geniuses, crackpots and charlatans who got us to where we are today, and remembers its voices, personalities and programmes that helped to form who we are as individuals and as a nation. He visits the key radio locations from history, and looks at its vital role over the past century on both national and local levels. Part nostalgic eulogy, part social history, part travelogue, Last Train To Hilversum is Connelly's love letter to radio, exploring our relationship with the medium from its earliest days to the present in an attempt to recreate and revisit the

world he entered on his childhood evenings on the dial as he set out on the radio journey of a lifetime.

A memoir of food and friendship “combining the warm-heartedness of Tuesdays with Morrie with the sensual splendor of Julie and Julia” (Booklist, starred review). Isabel Vincent first arrives at Edward’s New York apartment to check on him as a favor to his daughter. She has no idea that the nonagenarian baking a sublime roast chicken and a light-as-air apricot soufflé will end up changing her life. But their meeting comes at a moment of transition for each of them: Edward wants nothing more than to follow his late wife to the grave, while Isabel is watching her marriage unravel. As Edward and Isabel meet weekly for the glorious dinners that Edward prepares, he shares so much more than his recipes for apple galette or the perfect martini, or even his tips for deboning poultry. Edward teaches Isabel the art of slowing down, taking the time to think through her own life—cutting it back to the bone and examining the guts, no matter how messy that proves to be. Dinner with Edward is a book about love and nourishment, and about how dinner with a friend can, in the words of M. F. K. Fisher, “sustain us against the hungers of the world.” “A rare, beautifully crafted memoir that leaves you exhilarated.” —Rosemary Sullivan, author of Stalin’s Daughter “This is a memoir to treasure.” —Booklist (starred review)

The promise of the European pursuit of ever closer union created tremendous optimism that conflict was the past and harmony would be the future. The enthusiasm for economic integration and monetary union, through the Euro, enhanced the confidence that differences among countries could be overcome. In this dynamic and incisive overview of the European project from its beginnings, Ashoka Mody convincingly demonstrates that the tensions and flaws of the European project were both baked-in and foreseen from the beginning. He focuses on personalities whose ambitious and relentless push for integration led them to choose facts and analysis consistent with their visions and to dismiss warnings of turbulence. They thus laid the seeds for disappointment. Mody examines key moments when contradictions were papered-over, compromising the integrity of integration. He shows how political and economic leaders believed the stories they told themselves about the inevitability of a united Europe as a foundation of peace, prosperity, and democratic ideals, even in the face of warnings from the earliest stages that while the political pillars seemed strong, the economic foundations were weak. Mody compellingly shows how monetary union impaired European integration rather than enhanced it. European countries have always had vastly different economic conditions, and the common currency increased divergences rather than smoothing them, as many analysts warned at the time. The economic, financial, and political pathologies of the euro were there from the beginning, even if the global economic boom hid them. With political and economic elites benefitting, they could ignore the growing discontent of those who suffered and the antipathy to the European project in national heartlands. When crisis inevitably hit, leaders denied, delayed, and took half-measures that only further alienated people. If once the inability to deliver on the economic promise caused the political handicaps to worsen, now the political splintering is making it harder to mount an effective response.

Responses to major disasters tend to be complex, not merely because of the size and scale of operations and the number of countries and agencies involved, but also because of the range of functions represented by these organizations. A full-scale emergency response can involve people trained in at least 35 different disciplines and professions. This increasing sophistication of modern emergency response makes the process of coordination a particularly challenging one. It involves matching urgent needs with available resources in the most rapid and efficient way possible: timely mobilization and quick action can reduce injury and loss of life, as well as damage. Emergency response management has been likened to conducting a symphony orchestra. Only the conductor has the full score, but the overall effect of many people playing different instruments can be wonderful if properly directed. Professionalization of response and management is key. This book, Integrated Emergency Management for Mass Casualty Emergencies, presents papers from experts in the field which explore the challenges of planning for and responding to mass casualty emergencies. There are several chapters covering hospital procedure – including field hospitals and hospital evacuation – as well as natural and man-made casualty events, and the final chapter presents ‘Auxilium!’, a training simulation game. There is a clear need to improve management and integration in emergency response. This book will be of interest to all those whose work may involve them in preparing for and dealing with a disaster situation.

A celebration of waiting throughout history, and of its importance for connection, understanding, and intimacy in human communication We have always been conscious of the wait for life-changing messages, whether it be the time it takes to receive a text message from your love, for a soldier’s family to learn news from the front, or for a space probe to deliver data from the far reaches of the solar system. In this book in praise of wait times, award-winning author Jason Farman passionately argues that the delay between call and answer has always been an important part of the message. Traveling backward from our

current era of Twitter and texts, Farman shows how societies have worked to eliminate waiting in communication and how they have interpreted those times' meanings. Exploring seven eras and objects of waiting—including pneumatic mail tubes in New York, Elizabethan wax seals, and Aboriginal Australian message sticks—Farman offers a new mindset for waiting. In a rebuttal to the demand for instant communication, Farman makes a powerful case for why good things can come to those who wait.
