We live in an increasingly violent world. From suicide terrorists to serial killers, violent subjects challenge our imaginations. We seek answers to our questions on this subject in literature, cinema, and electronic media. In *Bloodscripts*, Elana Gomel examines how popular culture narratives construct violent subjectivity. Using such various narratives as mystery, horror; detective, and fantasy fiction as well as accounts of the atrocities perpetuated by serial killers and the Holocaust, *Bloodscripts* offers a new map of the genres of violence and links the twin obsessions of postmodern culture: crime and genocide. *Bloodscripts* is a stimulating, original, and accessible account of the narrative construction of the violent subject. It proposes a narrative model that will be of interest to literary critics, cultural scholars, criminologists, and anyone trying to understand the role of violence in postmodern culture.

Interdisciplinary explorations into the work of one of the premier writer-survivors of the Holocaust.

Todos hemos experimentado, en algún momento de nuestras vidas, un instante fugaz en el que una coincidencia sorprendente nos hizo sonreír y maravillarnos. Quizás conociste a tu alma gemela en un vuelo que no pensabas tomar, o recibiste la llamada de un amigo, del que llevabas mucho tiempo sin saber nada, el mismo día en que pensaste en él, o sentiste una señal concreta que te hizo tomar una decisión inesperada que cambió tu vida. Para algunos, las coincidencias son consecuencia del azar. Para estos racionalistas el universo funciona como un reloj, y el funcionamiento de la Gran Máquina se ajusta a las leyes de la probabilidad. Se trata solo de «meras» coincidencias. Otros creen que las coincidencias significativas son obra de su Dios, un Dios que los guía y los cuida. Entre Dios y la mera probabilidad se extiende una amplia gama de teorías. El campo emergente de los estudios de la coincidencia, disciplina que desarrolla el doctor Beitman, propone una conexión más estrecha entre la mente y el entorno que ha sido ya aceptada por la psiquiatría y la psicología actuales. Y por primera vez, desde los trabajos de Carl Jung, una investigación se aproxima científicamente al tema para tratar de identificar, comprender y, así, llegar a canalizar el poder de la coincidencia. Ese es el objetivo final de este libro.

In this book, Michela Ippolito proposes a compositional semantics for subjunctive (or would) conditionals in English that accounts for their felicity conditions and the constraints on the satisfaction of their presuppositions by capitalizing on the occurrence of past tense morphology in both antecedent and consequent clauses. Very little of the extensive literature on subjunctive conditionals tries to account for the meaning of these sentences compositionally or to relate this meaning to their linguistic form; this book fills that gap, connecting the different lines of research on conditionals. Ippolito's proposal will be of interest both to linguists and to philosophers concerned with conditionals and modality more generally. Ippolito reviews previous analyses of counterfactuals and subjunctive conditionals in the work of David Lewis, Robert Stalnaker, Angelika Kratzer, and others; considers the contrast between future simple past subjunctive conditionals and future past perfect subjunctive conditionals; presents a proposal for subjunctive conditionals that addresses puzzles left unsolved by previous proposals; reviews a number of presupposition triggers showing that they fit the pattern predicted by her proposal; and discusses an asymmetry between the past and the future among subjunctive conditionals, arguing that the best account of our linguistic intuitions must include an indeterministic view of the world.

This second collection of essays by Lewis focuses on causation probability, dependence and decision, and several other related topics. The thirteen papers are a major contribution to philosophy by one of the most influential and imaginative of contemporary American philosophers.

The life-long correspondence of David K. Lewis, one of the most influential philosophers of the twentieth century, reveals the development, breadth, and depth of his philosophy in its historical context. The first of this two volume collection of letters focuses on his contributions to metaphysics, arguably where he made his greatest impact.

The book provides an analysis of a key notion in our lives, causation: what its nature is; how we should characterise it in language, how it relates to laws of nature, how causes differ from their effects and why they tend to occur earlier than their effects.

Shlomo, and serves as a moving tribute to the man many consider a tzaddik (righteous one). The contents of this book emerge from the Catholic Worker House of Hospitality in New York City and the Saint Thomas Project in New Orleans. Two years of working with people on the margins of society confronted Marc Ellis with a truth and challenge: to delve deeper into his own life and the life of the world so as to begin the movement toward a new society. Since that time, in his travels through Latin America, the Middle East, and Asia, Ellis has been exposed to the global dimensions of the situations he experienced in New York's Lower East Side and in New Orleans. This book is an attempt to work through the questions posed to Ellis over his years among the poor and through his contact with the global issues of justice and peace. For some, fidelity is a question answered before asked; for the pious through dogma and eternal truth, for the cynic through denial and derision. For Ellis, fidelity is neither assumed nor negated. Rather, it is a struggle through which we search out our own humanity. As human beings born with an unfinished consciousness and into a specific historical context, the struggle to be faithful begins with the historical hour in which we live. This is our burden, but it is also an opportunity to become what we are called to be.

Drawing on the postmodern perspective and concerns that informed her groundbreaking *Terpischore in Sneakers*, Sally Bane's *Writing Dancing* documents the background and development of avant-garde and popular dance, analyzing individual artists, performances, and entire dance movements. With a sure grasp of shifting cultural dynamics, Banes shows how postmodern dance is integrally connected to other oppositional, often marginalized strands of dance culture, and considers how certain kinds of dance move from the margins to the mainstream. Banes begins by considering the act of dance criticism itself, exploring its modes, methods, and underlying assumptions and examining the work of other critics. She traces the development of contemporary dance from the early work of such influential figures as Merce Cunningham and George Balanchine to such contemporary choreographers as Molissa Fenley, Karole Armitage, and Michael Clark. She analyzes the contributions of the Judson Dance Theatre and the Workers' Dance League, the emergence of Latin postmodern dance in New York, and the impact of black jazz in Russia. In addition, Banes explores such untraditional performance modes as breakdancing and the "drunk dancing" of Fred Astaire. Ebook Edition Note: All images have been redacted.

This study is based on in-depth interviews with 18 American and Canadian Holocaust survivors who were born in various European countries, including Luxembourg. Ten of the interviewees were children or adolescents under the age of 16 during the war; the others were aged 16-21. Some of them survived Nazi camps (Auschwitz, Mauthausen, Plaszow, etc.), one survived Theresienstadt, one fought with Soviet partisans in Lithuania, and some survived in hiding or in exile. Analyzes their accounts as narratives of surviving persecution and terror in the context of growing up. Proposes a "challenged identity model" as a socio-psychological model able to account for their survival. This model suggests, inter alia, that personal characteristics of the individual were a factor in the survival of trauma associated with persecution, captivity, and abuse. Surmises that the transcendence processes in which survivors engaged during their ordeals were an intrinsic part of their ability to successfully construct new lives afterward.

Ryan Wasserman presents a wide-ranging exploration of puzzles raised by the possibility of time travel, including the grandfather paradox, the bootstrapping paradox, and the twin paradox of special relativity. He draws out their implications for our understanding of time, tense, freedom, fatalism, causation, counterfactuals, laws of nature, persistence, change, and mereology. The Paradoxes of Time Travel is written in an accessible style, and filled with entertaining examples from physics, science fiction, and popular culture.

Elie Wiesel has given hundreds of interviews. Yet his fame as a human rights advocate often directs such conversations toward non-literary issues. Indeed, many of Wiesel's questioners barely address the writer's role that has defined him since the 1950s. Unlike previous volumes in which he speaks with interviewers, *Elie Wiesel: Conversations* collects interviews which set in relief the writer at work. This book focuses on Wiesel the literary artist instead of Wiesel the Holocaust survivor or the 1986 Nobel Peace Prize laureate. Beyond highlighting Wiesel's literary significance, these interviews also correct many faulty assumptions about his achievement. Few American readers know that he writes in French, that he has been favorably compared to André Malraux and Albert Camus. Not many realize that the Holocaust has been the subject of only a few of his forty books. Particularly in his nonfiction, Wiesel's scope is wide, addressing Jewish life in all its religious and historical complexity. Though most of Wiesel's books do not focus on the Holocaust, they are written against the backdrop of what he has come to term "The Event." Always, the presence of Auschwitz can be felt, always the author "lives in the shadows of the flames that once illuminated and blinded him." These interviews are reminders that the writing life is both solitary and public, interior and social. The writer must venture beyond his study and speak out against the world's traumas and outrages.

Like Anne Frank, Hilde Jacobsthal was born in Germany and brought up in Amsterdam, where the two families became close. Unlike Anne Frank, she survived the war, and Otto Frank was to become godfather to Rita, her first daughter. "I am the child of a woman who survived the Holocaust not by the skin of her teeth but heroically. This book tells the story of my mother's dramatic life before, during and after the Nazi invasion of the Netherlands in 1940. "I wrote *Motherland* because I wanted to understand a story which had become a kind of family myth. My mother's life could be seen as a narrative of the twentieth century; along with my father she was present and active at many of its significant moments." Rita Goldberg Hilde Jacobsthal was fifteen when the Nazis invaded Holland. After the arrest of her parents in 1943 she fled to Belgium, where she went into hiding and worked with the Resistance at night. She was liberated by the American army in 1944. In April 1945 she volunteered with a British Red Cross Unit to go to the relief of Bergen-Belsen, which had itself been liberated one week before her arrival. The horror and devastation were overwhelming, but despite her shock and grief she stayed at the camp for two years, helping with the enormous task of recovery. Sorrow and exuberance went hand in hand as the young people at Belsen found renewed life and each other. Hilde got to know Hanns Alexander (subject of the recently published *Hanns and Rudolf*), who was on the British War Crimes Commission, and, eventually, a Swiss doctor called Max Goldberg. *Motherland* is the culmination of a lifetime of reflection and a decade of research. Rita Goldberg enlarges the story she heard from her mother with historical background. She has talked with her about the minutest details of her life and pored over her papers, exploring not only her mother's life but her own. Complicated feelings are explored lightly as Rita takes the story beyond Bergen-Belsen, where paradoxically her parents met and fell in love; beyond Israel's War of Independence where they both volunteered, and on to the next chapter of their lives in the US. A deeply moving story, *Motherland* will become an essential text about World War II, the Holocaust and the survival of the spirit.

This is an enthralling personal account of the secret Nazi project, Operation Bernhard, devised to destabilize the British and, later, American economies by creating and putting into circulation millions of counterfeit banknotes. A team of typographers and printers was pulled out of the rows of prisoners on their way to the gas chambers and transferred to the strictly isolated Block 19 in Sachsenhausen concentration camp. There they were presented with the enormous task of producing almost perfect counterfeits to the value of hundreds of millions of pounds sterling. These notes were to be dropped from bombers over London, with the aim of causing financial chaos. When the time came the

Luftwaffe's resources were fully committed in other campaigns and theaters but some of the currency was successfully used to fund operations in Germany's secret war.

Book Five THE INNOCENCE OF THE JUST The Holocaust in Hungary and Slovakia during World War II In 1944, Hitler refuses to abandon his plans to deport the last remaining, huge concentration of Jews in Europe. Over one million Jews live relatively untouched in Hungary. He calls for the renovation and enlargement of the Auschwitz concentration camp in Poland. It's only at this time that Roosevelt and the rest of the world learn the truth about Auschwitz and the extermination camps of Poland. To bomb the camps then becomes a grave issue. Discovering also from these covert reports that Heinrich Himmler, Hitler's second-in-command and head of the SS, is willing to secretly negotiate with Roosevelt to end the war, Roosevelt sees the opportunity to preserve even more of the Jews in Europe. He decides to use them as his bargaining chip and sole condition for opening negotiations with Himmler. In the meantime, under the guise of needing a hundred thousand able-bodied Hungarian laborers and their families for the war effort back in Germany, Hitler hoodwinks the elderly Regent of Hungary, Miklos Horthy, and oversees a swift occupation of Hungary in March of 1944 by his Wehrmacht. Over four hundred thousand Jews are deported to Auschwitz in less than two months time by Adolf Eichmann's SS and the newly-installed, pro-Nazi and pro-German quisling Hungarian government and its thousands of rightist police. When Horthy learns the truth about Auschwitz and receives pressure from Roosevelt and the Vatican, he re-exerts his authority and halts the deportations. After an assassination attempt on Hitler in July of 1944, Himmler is encouraged by his associates to also exert his authority and approach Roosevelt's representatives in Switzerland to initiate serious negotiations to bring about a separate peace and an end to the persecution of the Jews. ; Leo V. Kanawada, Jr.
